OVERALL REVIEW NOTES

Write any high-level observations, overall impressions, or notes that don't fit in a specific check item...

 Opening print dialog — choose "Save as PDF"

Authentication

5✓ 0X 1— ▾

Signup — form renders correctly

Navigate to /signup — email field, password field, submit button visible

HIGH

GAPS / ISSUES

visually hard to read the parts of the form

IMPROVEMENTS

also take full name and maybe username and any roles if involved. Okay

Signup — creates account successfully

Enter valid email + password (≥6 chars) → success message "Check your email"

HIGH

GAPS / ISSUES

I think the email sending stuff on supabase is not set that's why I didnt' receive any email and I turned the setting off to confirm email

IMPROVEMENTS

Improve the signup feedback based on the signup result. OKay

Login — valid credentials redirect to /dashboard

Enter confirmed email + password → redirected to dashboard

HIGH

GAPS / ISSUES

Describe any bugs or issues...

IMPROVEMENTS

Suggest improvements...

Login — wrong password shows error

Enter wrong password → red error alert appears, no redirect

MEDIUM

GAPS / ISSUES

Describe any bugs or issues...

IMPROVEMENTS

Suggest improvements...

Auth guard — unauthenticated → redirects to /login

Open /dashboard in incognito or after logout → redirected to /login

HIGH

GAPS / ISSUES

Describe any bugs or issues...

IMPROVEMENTS

Suggest improvements...

Sign out works

Click sign-out button in navbar → redirected to /login, session cleared

HIGH

GAPS / ISSUES

Opening print dialog — choose "Save as PDF"

Describe any bugs or issues...

Suggest improvements...

 Opening print dialog — choose "Save as PDF"

Dashboard

6✓ 0X 1— ▾

Dashboard loads and shows monitor list

After login → /dashboard renders without errors, shows existing monitors

HIGH

● GAPS / ISSUES

Describe any bugs or issues...

💡 IMPROVEMENTS

Suggest improvements...

Empty state shows for new users

Fresh account with no monitors → empty state with "Create Monitor" CTA

MEDIUM

● GAPS / ISSUES

Describe any bugs or issues...

💡 IMPROVEMENTS

Suggest improvements...

Monitor cards show correct status pill

Up = green, Down = red, Pending = yellow. Color-coded correctly

HIGH

● GAPS / ISSUES

Describe any bugs or issues...

💡 IMPROVEMENTS

Suggest improvements...

24hr uptime percentage shows on cards

After worker runs, uptime % is visible on monitor card

MEDIUM

● GAPS / ISSUES

Describe any bugs or issues...

💡 IMPROVEMENTS

Suggest improvements...

● REALTIME — status pill updates without refresh

Keep dashboard open, worker changes a monitor status → pill updates live (≤5s delay)

HIGH

● GAPS / ISSUES

page data and status was not updated without refreshed

💡 IMPROVEMENTS

also provide a manual refresh button for the user and only let the user to refresh after 30 seconds. Okay

Metrics row (Total / Up / Down / Pending) is accurate

Counts at top of dashboard match actual monitor statuses

MEDIUM

● GAPS / ISSUES

🖨 Opening print dialog — choose "Save as PDF"

Describe any bugs or issues...

Suggest improvements...

Clicking a monitor card navigates to detail page
Click on any monitor card → /monitors/[id] page loads

HIGH

GAPS / ISSUES

IMPROVEMENTS

Describe any bugs or issues...

Suggest improvements...

 Opening print dialog — choose "Save as PDF"

 Monitor CRUD (Create / Edit / Delete)

7/ 0X 0— ▾

New monitor form renders at /monitors/new

All fields visible: Name, URL, Expected status, Check interval, Timeout

HIGH

 **GAPS / ISSUES**

Describe any bugs or issues...

 **IMPROVEMENTS**

Suggest improvements...

Create monitor — valid submission works

Fill form with valid URL → submits → redirected to /monitors/[id]

HIGH

 **GAPS / ISSUES**

Describe any bugs or issues...

 **IMPROVEMENTS**

Suggest improvements...

Create monitor — invalid URL shows error

Enter "notaurI" → API or browser validation prevents submission with error

MEDIUM

 **GAPS / ISSUES**

Describe any bugs or issues...

 **IMPROVEMENTS**

Suggest improvements...

Edit monitor — pre-fills existing values

Click Edit on monitor detail → /monitors/[id]/edit form pre-populated

HIGH

 **GAPS / ISSUES**

Describe any bugs or issues...

 **IMPROVEMENTS**

Suggest improvements...

Edit monitor — changes saved correctly

Change name/URL → Save → detail page shows updated values

HIGH

 **GAPS / ISSUES**

Describe any bugs or issues...

 **IMPROVEMENTS**

Suggest improvements...

Pause / Resume monitor works

Click Pause → is_active = false → pill shows "paused". Click Resume → active again

MEDIUM

 **GAPS / ISSUES**

Opening print dialog — choose "Save as PDF"

Describe any bugs or issues...

Suggest improvements...

Delete monitor — confirm dialog shown, then deleted

HIGH

Click Delete → confirm dialog → confirm → redirected to /dashboard, monitor gone

GAPS / ISSUES

IMPROVEMENTS

own dialog box or used shadcn for this kind of purposes and also reflect the processing or loading request with a loading spinner it looks more professional. Okay

Suggest improvements...

 Opening print dialog — choose "Save as PDF"

Monitor Detail Page

5✓ 0X 1— ▾

Detail page loads with monitor info

Name, URL, status pill, metrics row all visible

HIGH

GAPS / ISSUES

Describe any bugs or issues...

IMPROVEMENTS

Suggest improvements...

Latency chart renders (after worker runs)

Line chart with hourly average latency visible — not blank

HIGH

GAPS / ISSUES

chart more grannular and efficient. but I an not 100% sure about that and in future we will make more extensions in our project so I think we also need to consider that before hand in

IMPROVEMENTS

Suggest improvements...

90-day uptime bar renders correctly

Colored segments (green/red/grey) visible, uptime % shown, dates at ends

HIGH

GAPS / ISSUES

improvement there but still I am satisfied with the chart and if more changes or complexity is required in the changes then we can do something seperately you can decide things

IMPROVEMENTS

Suggest improvements...

Recent checks table shows ping log data

Table with: time, status, HTTP code, latency, error (if any)

MEDIUM

GAPS / ISSUES

Describe any bugs or issues...

IMPROVEMENTS

I was thinking of applying pagination to our rercent checks and other parts of the tables and also filtering based on different fields

Incident banner shows for ongoing incidents

Monitor in DOWN state with open incident → red banner at top of detail page

HIGH

GAPS / ISSUES

Describe any bugs or issues...

IMPROVEMENTS

same improvements as the recent checks because it is a table and also try to keep the code dry because we will be creating a lot of tables because of the current decision of

Incidents section shows history

Past incidents listed: started_at, resolved_at, duration, cause

MEDIUM

GAPS / ISSUES

Opening print dialog — choose "Save as PDF"

Describe any bugs or issues...

Suggest improvements...

 Opening print dialog — choose "Save as PDF"

 Background Worker

6/ 0X 0— ▾

Worker starts without errorsHIGH

Run `bun run src/index.ts` → logs "Starting uptime monitor worker..." with no crashes

 GAPS / ISSUES

Describe any bugs or issues...

 IMPROVEMENTS

Suggest improvements...

Worker writes ping_logs to SupabaseHIGH

After one tick, check Supabase → ping_logs table has new rows with status + latency

 GAPS / ISSUES

Describe any bugs or issues...

 IMPROVEMENTS

Suggest improvements...

Worker updates monitor current_statusHIGH

After pinging, monitors table row shows updated current_status (up/down)

 GAPS / ISSUES

Describe any bugs or issues...

 IMPROVEMENTS

Suggest improvements...

Incident opens after N consecutive failuresHIGH

Point monitor at dead URL → after FAILURE_THRESHOLD failures → incident row in DB

 GAPS / ISSUES

Describe any bugs or issues...

 IMPROVEMENTS

Suggest improvements...

Incident resolves when monitor recoversHIGH

Fix the URL → worker next tick → resolved_at set, incident marked closed

 GAPS / ISSUES

Describe any bugs or issues...

 IMPROVEMENTS

Suggest improvements...

Timeout handling works correctlyMEDIUM

Point monitor at a slow endpoint with short timeout → status = "timeout" in ping_logs

 GAPS / ISSUES

 Opening print dialog — choose "Save as PDF"

Describe any bugs or issues...

Suggest improvements...

 Incidents Page

4✓ 0X 0— ▾

/incidents page loads all user's incidents

HIGH

Incidents across all monitors visible in the table

GAPS / ISSUES

Describe any bugs or issues...

IMPROVEMENTS

Suggest improvements...

Filter by Open / Resolved works

MEDIUM

Click "Open" → only ongoing incidents shown. "Resolved" → only closed shown

GAPS / ISSUES

Describe any bugs or issues...

IMPROVEMENTS

Suggest improvements...

Filter by monitor works

MEDIUM

Select a specific monitor in dropdown → only that monitor's incidents shown

GAPS / ISSUES

Describe any bugs or issues...

IMPROVEMENTS

Suggest improvements...

Duration calculated correctly

MEDIUM

Ongoing incident shows elapsed time. Resolved shows total downtime

GAPS / ISSUES

Describe any bugs or issues...

IMPROVEMENTS

Suggest improvements...

 Opening print dialog — choose "Save as PDF"

Settings & Alert Channels

5/ 0 X 0 — ▾

Settings page loads

HIGH

/settings renders: public status URL section, alert channels section, account

● GAPS / ISSUES

Describe any bugs or issues...

💡 IMPROVEMENTS

Suggest improvements...

Add email alert channel

HIGH

Type: Email, Destination: your@email.com → Add → appears in list

● GAPS / ISSUES

Describe any bugs or issues...

💡 IMPROVEMENTS

Suggest improvements...

Add webhook alert channel

HIGH

Type: Webhook, Destination: valid HTTPS URL → Add → appears in list

● GAPS / ISSUES

Describe any bugs or issues...

💡 IMPROVEMENTS

Suggest improvements...

Delete alert channel works

MEDIUM

Click trash icon on a channel → it's removed from the list

● GAPS / ISSUES

Describe any bugs or issues...

💡 IMPROVEMENTS

Suggest improvements...

Status page URL copy button works

LOW

Click Copy → clipboard contains /status/[userId] URL

● GAPS / ISSUES

Describe any bugs or issues...

💡 IMPROVEMENTS

Suggest improvements...

🖨 Opening print dialog — choose "Save as PDF"

**Public Status Page**

4/ 0x 0 — ▾

Status page loads without login

HIGH

Open /status/[userId] in incognito → page loads, no redirect to login

● GAPS / ISSUES

Describe any bugs or issues...

**💡 IMPROVEMENTS**

Suggest improvements...

Overall status banner shows correct state

HIGH

All up → "All Systems Operational" (green). Any down → "Degraded" (red)

● GAPS / ISSUES

Describe any bugs or issues...

**💡 IMPROVEMENTS**

Suggest improvements...

90-day uptime bar renders per monitor

HIGH

Each monitor card has the colored uptime bar with % label

● GAPS / ISSUES

Describe any bugs or issues...

**💡 IMPROVEMENTS**

Suggest improvements...

No edit controls visible on status page

MEDIUM

Read-only — no delete/edit/pause buttons anywhere

● GAPS / ISSUES

Describe any bugs or issues...

**💡 IMPROVEMENTS**

Suggest improvements...

Opening print dialog — choose "Save as PDF"

UX, Design & Navigation

5/ 0X 0— ▾

Sidebar navigation works on all pages

Dashboard, New Monitor, Incidents, Settings links all work and show active state

HIGH

GAPS / ISSUES

Describe any bugs or issues...

IMPROVEMENTS

Suggest improvements...

Loading states show on form submissions

Buttons show spinner + disabled state while API calls are in-flight

MEDIUM

GAPS / ISSUES

Describe any bugs or issues...

IMPROVEMENTS

Suggest improvements...

Overall visual design looks premium

Dark theme, typography, status pills, cards — does it feel polished?

LOW

GAPS / ISSUES

Describe any bugs or issues...

IMPROVEMENTS

Suggest improvements...

No console errors on any page

Open DevTools → Console → browse all pages → no red errors

MEDIUM

GAPS / ISSUES

Describe any bugs or issues...

IMPROVEMENTS

Suggest improvements...

Back navigation works from detail pages

"Back to Dashboard" link and browser back button work without breaking state

LOW

GAPS / ISSUES

Describe any bugs or issues...

IMPROVEMENTS

Suggest improvements...

ADDITIONAL IMPROVEMENTS & FEATURE REQUESTS

Opening print dialog — choose "Save as PDF"

I think there is a very need to add some stuff like making the website feel more like have a genuine purpose and have features to exist like taking over a problem of a user and then satisfies. like by using workflows or something else. I am not sure about that but I want you to think about it and come up with a plan and based on that I think the project will be automatically extended with other stuff that we usually see in a real world project to manage users and other stuff (I am not sure about all of them but they are like non-
